Based in the Netherlands.
Open to relocating.

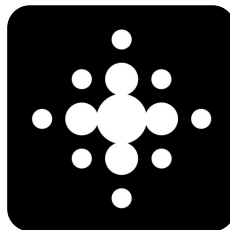

Karthik Mahadevan

Designer and builder at the intersection of AI, wearables and accessibility. For nine years I have shipped voice-first, camera-first AI to people who are blind or have low vision, the one audience that cannot fall back on a screen. Trained as an industrial designer at TU Delft; happiest turning audacious technology into something people rely on every day.

WORK

Envision Founder and CEO

2017 to present
